EXPLANATION

3 The inclusion of this explanation does not constitute agreement with
4 the explanation's substance by the members of the general assembly.

5 This bill provides more options by which an instructor may
6 qualify to teach at a community college in the subject area
7 of career and technical education (CTE). The bill permits an
8 instructor to teach CTE classes at a community college if the
9 instructor possesses a baccalaureate degree in any area if at
10 least 18 of the credit hours completed were in the CTE field
11 in which the instructor teaches; or possesses an associate
12 degree in the CTE field of instruction in which the person is
13 teaching, if such degree is considered terminal for that field
14 of instruction, and the instructor has at least 3,000 hours of
15 recent and relevant work experience in the area in which the
16 instructor teaches classes.

17 Currently, an instructor must have a baccalaureate or
18 graduate degree relating to the area in which the instructor is
19 teaching classes or, if the instructor possesses less than a
20 baccalaureate degree, must have special training and at least
21 6,000 hours of recent and relevant work experience in the area
22 in which the instructor teaches classes. In the latter case,
23 if the instructor is a licensed practitioner who holds a career
24 and technical endorsement under Code chapter 272, classroom
25 instruction can be used to meet the requirement relating to
26 relevant work experience, and the bill applies this language to
27 the new option as well.
